# Journal8

---

## URL

The URL for the source code of this project is available here:

## Assignment Writeup

### Intentions

Correcting upon Journal 7's project. I added features to detect what semester we are currently in, and only display courses from that semester.

### Input Work Done

Created a way to detect what semester we are in (for SPXX or FALLXX).

### Output Results

Reproduced the functionality of last week, but reducing the information displayed down to the current semester.

### Approach

I used text parsing and date parsing to cross reference the current semester.

### Thoughts on the results

I'm happy with the results, and it will create a more robust tool that hopefully Bryan may be able to use for semesters to come.

## Dependencies

- [python3](#)

## Usage

```
$ python3 Journal8.py language [--auto]
```
