# Journal7

---

## URL

The URL for the source code of this project is available here: <https://github.com/ekivolowitz/LIS351Projects/tree/master/Journal7>

## Assignment Writeup

### Intentions

Someone asked me what week we talked about foo . I didn't have an answer, but I thought that'd be an easy thing to enumerate with python.

### Input Work Done

I had to explore with the API to find the assignments lists, which I did in the console in the browser. Then I modified the path and found the data that I wanted.

### Output Results

This worked really well - here is an example of the input and output.

### Approach

To do this, I really just needed to see where the data was. To do that, all I needed was to explore the API on the browser.

### Thoughts on the results

I'm happy with it. It will 100% make the packets easier...

## Dependencies

- [python3](#)
- [argparse](#)
- [termcolor](#)
- [BeautifulSoup](#)

## Usage

```
$ python3 Journal7.py search_term
```

## References

None
